INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International Application No.
PCT/EP 03/13437

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-11	YES
	Claims		NO
Inventive step (IS)	Claims	1-11	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-11	YES
	Claims		NO

2. Citations and explanations

1. Claim 1

1.1 Claim 1 satisfies the requirements of PCT Article 33(2) to (4) in respect of novelty, inventive step and industrial applicability.

1.2 Since none of the documents cited in the search report or acknowledged in the introductory part of the description discloses the features of independent claim 1 in their entirety, the subject matter of claim 1 is novel.

1.3 For a person skilled in the art, the documents cited in the search report contain nothing to suggest configuring the fixing as per the characterising part of claim 1, in a brush seal according to the preamble of main claim 1 (as per US-A-5 066 024). The feature, appropriate for the production of a multiple brush ring bearer, that the second brush ring bearer is fixed to the first brush ring bearer by means of a snap connection (in particular a non-releasable snap connection), is the outcome of a step that is not a logical development of the prior

art citations. In consequence, the brush seal according to claim 1 involves an inventive step.

1.4 The subject matter of claim 1 can be made and used and is therefore considered industrially applicable.

2. Claims 2-11:

2.1 Claims 2-11 are dependent on claim 1 and thus likewise satisfy the requirements of the PCT in respect of novelty, inventive step and industrial applicability (PCT Article 33(2) to (4)).
